Professional Experience

Senior Consultant May 2014 to Present

Ernst & Young/Northpoint Digital (EY acquired NPD in 11/2015), New York, NY

- Full stack developer for a project for a major telco which integrates data from a CMS's RESTful web services into an existing Angular application. This was done using Typescript, Java w/ Selenium running as a Spring service, jGit, and Sitecore.
- Interfaced with clients, creative agencies and technical firms to help develop 30+ successful Sitecore websites for a pharmaceutical client using Sitecore, C#/ASP.NET, SASS, Javascript, PhantomJS and RESTful Web Services.
- Project Manager for 5 successful Sitecore websites for a pharmaceutical client. Worked with the client and the internal team to delegate tasks and meet deadlines, met regularly with the client and other involved firms to produce a high-quality result that left all parties satisfied.
- Backend developer on a large, custom Sharepoint portal for a pharmaceutical. This Sharepoint repository stores their research data and allows users to submit new documents and pass them through their appropriate workflows.
- Wrote Powershell scripts to help a client migrate existing documents along with their meta-data into a newly developed Sharepoint repository.
- Frontend developer for responsive job listing website using SASS, Html, jQuery, and Zurb Foundation.

Software Engineer, November 2006 to May 2014

Riptide Software, Orlando, FL

- Lead engineer of a web portal heavily used by the US Army and Marines. The site has over 3000 registered users accessing vital information for the US military Live Training community. My work on this portal utilized DNN, C#/ASP.NET, jQuery, SQL Server, and Telerik Controls.
- Full time developer for 3 ASP.NET web portals using the DNN framework - the intranet site for the Riptide Software, an inventory tracking portal for Raytheon, and a collaboration portal for the US Marine Corps.

Personal Experience

iOS App Developer – NYC Bus Map Live, January 2018 to Present

<http://nyc-bus-map.eddie-soto.com/>

- Actively developing an iOS app that tracks MTA buses on a live Google Map.
- App is built in Swift using Xcode, Google Maps API, Alamofire, and SQLite
- Server is built using .NET MVC, REST Web Services, MTA BusTime API

Android App Developer – NYC Bus Map Live, February 2016 to Present

<http://nyc-bus-map.eddie-soto.com/>

- Actively developing an Android app that tracks MTA buses on a live Google Map.
- App currently has 2,000+ active users with a 4+ rating on the Play Store.
- App is built in Java using Android Studio, Google Maps API, loopj Android Asynch HTTP Client, date4j, SQLite
- Server is built using .NET MVC, REST Web Services, MTA BusTime API

Education

Florida International University, Miami, FL

Bachelor of Science in Computer Science, May 2006

In-major GPA: 3.75/4.00, Overall GPA: 3.70/4.00
